sofia™
Atraumatic Spring Clips

Item #	Jaw Opening	Jaw Length	Units/Box	Force	Color
VSJ1807	7mm	18mm	12	1/4	Yellow
VSL1807	7mm	18mm	12	1/2	Lilac
VSB1807	7mm	18mm	12	3/4	Blue

The Vitalitec Sofia™ Spring Clips are made of the highest quality materials and tested to precise specifications. The jaws length and opening are maximized to meet most temporary Spring Clip needs. Sofia™ jaws are atraumatic, yet hold extremely well due to the unique soft insert material and design. Special care was taken in developing a Spring Clip that closes tips first, encompassing the vessel, with the final result providing parallel closure of the jaws and a more uniform closing pressure.

You will note that the padded jaws extend past the “arms” thus offering further piece of mind when placing the Sofia™ Spring Clips.

Available in 3 different closing pressures, the Sofia™ Spring Clip family is an excellent alternative to both reusable spring clips and the many costly disposable versions on the market today.

Saving money with a better product...let Vitalitec be your choice for both permanent and temporary occlusion.
